cases
95% interval 3,372–4,876
+51% vs 2025 (2,771)

Highlights

Claude's observations

- New full-scale (1.0) dataset: HIGH 151 (+145 vs the 0.1-scale report of 2026-10-01); jumps reflect scale, not risk
- Care (8 demo plans, small numbers): 5 overdue tasks, 2 CHW escalations, 44.4% completion, no endoscopy done yet
- All 151 HIGH await endoscopy; the 6 validations cover the previous model only, none yet for tier2-xgb-202610020956
- 2026 ASR 38.3 (partial year, annualised) vs 33.4 in 2025; synthetic 2031 outlook 4,186 cases (95% 3,372-4,876)
